

DO YOU THINK YOU'RE COMPLIANT? COMPLIANCE IS MORE THAN A CHECKLIST!

With the many layers of compliance needed in a dental practice today it's critical that the team understand their individual roles in the process.

There are many layers of compliance that a practice is mandated to follow. Whether it is OSHA, HIPAA, or ACA, written procedures and team training must be updated annually.

Gain a better understanding of the regulations and requirements these agencies mandate to keep your practice compliant.

You also need Radiation Safety, Infection Control, and Risk Mitigation in your written policies and procedures.

Understanding these layers makes your practice run smoother.

Suggested Audience: Practice Administrator, Dentist, & Team

PROGRAM OBJECTIVES:

- How to update your HIPAA manual to include protocols regarding protected health information of your patients (during COVID and beyond)
- Review the steps to mandatory HIPAA compliance
- How to ensure your WRITTEN Radiation Safety protocol includes rationale for prescribing x-rays, diagnosis and treatment planning and team training
- Learn what constitutes “a change in your practice?”
- How to perform your own OSHA walk-through assessment
- Fit Tests are mandatory for N95 respirators. Learn how to conduct your own.
- Understanding ACA Regulations for practices that accept Federal Funding
